Hi Yasmine

OSC Bob Kelly (retired) had this Site on a list of sites he received from either the State or pre-Remedial. Frankly I do not know which. I accompanied him on the assessment of this location. I remember reviewing a single document from the State (Assessment report) and looking at the area and talking with WVDEP. I do not remember the year, but I thought it was before 2011. I also remember that the DEP did not actually request that we collect any samples or conduct further assessment activity. I am fairly confident that we did not advance this assessment since it did not initially appear that any exposure potential was evident to drive removal activity. So, I can't answer whether or not there is any documentation that would amount to a site file, but I doubt it.

Hi Mike & Fran,

I'm still learning your regions, and am not sure whose region this site belongs to.

Site Assessment is in the process of reviewing sites that needed a final decision. I would like to schedule a meeting with you and Justin Bleiler, SAM, to discuss the Libbey Owens Ford Plant site in Charleston, WV.

Background:

Based on a 2011 Site Inspection, the status of the site was changed to "Referred to Removal – No Further Remedial Assessment" in 2012 (RSAD is attached). However, Justin was not able to find any Removal files for the site nor documentation of any Removal work performed at the site.

Please let me know of your availability for the month of Feb.

Thanks,

Yaz
